1TON ELECTRIC DRIVEN RSW CHILLS APPROX. 500LBS.(60 GAL.) OF WATER FROM 58°F TO 34°F / HR

DUAL TEMP OPTION AVAILABLE

1 TON TOTE CHILLER – TH DEDICATED TOTE CHILLER

The one ton tote chiller is very popular for keeping live prawns and crab aboard your vessel. This is ideal for the high speed boats that make the return trip to offload each day. Also great for the days when the catch is abundant and extra chilling capacity is needed. Another big use for this product is tuna pre-chilling. Don't stop fishing due to warm fish on deck! Drop them into this pre-chiller and finish fishing. When you get back to your catch they are chilled and easy to process. A great addition to any tuna operation. Order with Dual Temp capabilities to IQF your product!!

1 TON RSW REQUIRES A 3000W INVERTER GENERATOR AND A SMALL OVERBOARD SEAWATER SUPPLY.

HAUL YOUR PRODUCT FOR TOP DOLLAR!
