

## LARGE RSWS

### High-Capacity Chilling with Scalable Performance

Built for vessels that demand more — our Large RSW systems deliver scalable chilling power from 12 to 33 tons, all in a compact, rugged single-pack design. Whether you're handling massive hauls or pushing for faster chill times, these units adapt to your needs with adjustable RPM-based capacity. Designed for durability, serviceability, and nonstop performance in the harshest marine environments, this is chilling power you can depend on trip after trip.

|                                     |                                                                                                 |
|-------------------------------------|-------------------------------------------------------------------------------------------------|
| <b>COMPACT, SINGLE-PACK DESIGN</b>  | Powerful performance with a minimal footprint — easy to install and integrate on large vessels. |
| <b>MARINE-GRADE DURABILITY</b>      | Built with rugged materials and coatings to withstand tough marine conditions.                  |
| <b>PREWIRED FOR REMOTE MOUNTING</b> | Includes remote-ready electrical components for flexible placement and easy control access.     |
| <b>REMOVABLE ELECTRICAL PANEL</b>   | Simplifies servicing and reduces maintenance time at sea.                                       |

## TITANIUM TURBO CHILLERS

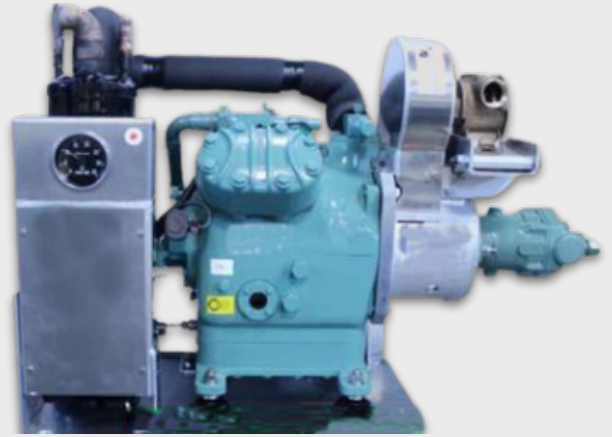

These chillers have better refrigerant control and more capacity than most standard large chillers. Each chiller is made with coiled Titanium Refrigeration Tubes, creating the "Turbo" effect as the refrigerant travels through the tubes.

12 TON HYD RSW

23 TON HYD RSW

TON HYD RSW

42 TON HYD RSW

## CHOOSE YOUR CHILLING CAPACITY

- 12-15 Ton → Chills 12T at 1450 RPM or 15T at 1750 RPM
- 15-18 Ton → Chills 15T at 1450 RPM or 18T at 1750 RPM
- 18-23 Ton → Chills 18T at 1450 RPM or 23T at 1750 RPM
- 23-27 Ton → Chills 23T at 1450 RPM or 27T at 1750 RPM
- 27-33 Ton → Chills 27T at 1450 RPM or 33T at 1750 RPM
