

3 TON BELT DRIVE RSW

The 3 Ton Belt Drive RSW is a compact and efficient refrigeration system designed for small vessels. With a pre-piped, pre-wired setup, it ensures quick installation and reliable cooling performance.

CHILL TIMES (under ideal conditions)

The 3 Ton Belt Drive RSW chills 5,500 lbs of water and fish from 55°F to 34°F in 5 hours at 1800 RPM

The 3 Ton Belt Drive RSW chills 5,500 lbs of water and fish from 55°F to 34°F in 7.5 hours at 900 RPM

ADJUSTABLE TENSION BASE	Easy belt adjustments for optimal performance.
REMOTE WHEELHOUSE PANEL	12V panel with high and low-pressure readouts.
PRE-ENGINEERED & RUN-TESTED	Ensures smooth operation and easy setup.
NO AUXILIARY POWER NEEDED	Belt-driven compressor operates directly from the engine.

TITANIUM TURBO CHILLERS

These chillers have better refrigerant control and more capacity than most standard large chillers. Each chiller is made with coiled Titanium Refrigeration Tubes, creating the "Turbo" effect as the refrigerant travels through the tubes.

"A solid RSW system—easy to install, runs smooth, and keeps fish cold without hassle."
